

X-ANALYTICS PRODUCTS AT A GLANCE

X-ANALYTICS ENTERPRISE

X-Analytics **Enterprise** is a cloud-delivered cyber risk decisioning application. This annual subscription provides business insights for better cyber risk management decisions. With X-Analytics Enterprise, businesses can quickly and easily visualize financial exposure to cyber risk and answer key business questions such as:

- What is our financial exposure as a result of cyber risk?
- What is our best next cyber investment to reduce our financial exposure?
- What cyber technical controls could be prioritized to reduce our financial exposure?
- Does our cyber insurance cover our likely financial exposure?

X-Analytics Enterprise facilitates a quarterly data input process enabling businesses to rapidly visualize financial exposure due to cyber risk and make effective decisions to deliver a standard and repeatable approach for making data driven cyber risk decisions that businesses can operationalize across the enterprise with ease.

X-ANALYTICS EXPRESS

Built on the same data analytics as our flagship cyber risk decisioning application, X-Analytics Enterprise, **Express** synthesizes a myriad of sophisticated calculations into a simple, fast, and effective snapshot presenting a company's economic exposure as a result of cyber risk. Whether used as an addition to a traditional cyber assessment, part of a Board cyber briefing, or used to understand cyber exposure across a business unit portfolio, X-Analytics Express can be used to quickly and efficiently highlight organizational cyber risk hot spots.

X-ANALYTICS SUPPLY CHAIN

X-Analytics **Supply Chain** delivers cyber risk financial insights across an organization's vendor and supplier ecosystem. This cloud-delivered, annual subscription provides business insights for better supply chain and third-party cyber risk management decisions. X-Analytics Supply Chain is built on and includes all the components of the standard X-Analytics Enterprise subscription.

X-Analytics Supply Chain is a cloud-delivered, self-service application enabling companies to:

- Optimize and streamline third-party cyber risk review that highlights cyber related financial and business exposures presented by suppliers and third-party vendors,
- Analyze each reviewed third party to aid in third-party relationship management,
- Make informed decisions to de-risk key vendor-supplier relationships, and
- Communicate appropriate guidance to suppliers and third parties.
